From hope to happiness. Choosing an egg donor is a deeply meaningful decision.

Allow us to assist you in making this lifelong decision, which will have lasting significance for both you and your future child. In the absence of personal interaction, it is essential that this choice is supported by information you can truly trust.

At OVACY Egg Bank, we approach this process with warmth, transparency, and integrity. Alongside comprehensive medical and genetic screening, we provide thoughtfully developed donor profiles, including personal background, genetic and psychological insights, complimented by AI facial matching, to offer a more complete understanding of each donor.

Our aim is to support you with clear and reliable information, helping you feel confident and reassured as you make this important decision.

ABOUT US

Who We Are

A leading donor egg bank based in Cyprus (EU), internationally recognised for excellence. We provide meticulously screened donor eggs to clinics and patients worldwide, combining scientific precision with a highly personalised approach.

Trusted globally for exceptional clinical results, OVACY was founded on the belief that every family-building journey deserves dignity, transparency, and the highest standard of care.

OUR ORIGINS

A Legacy of *Care*

Founded within the ISIS Clinic ecosystem, Cyprus's most acclaimed fertility centre since 2009, OVACY was established in 2023 as a dedicated, elevated service committed to clinical precision and compassionate care.

REGULATORY COMPLIANCE

EU Tissue & Cell Directive
2004/23/EC, Fully Compliant, Cyprus (EU)

HFEA Approved
Human Fertilisation & Embryology
Authority, UK

Single European Code (SEC)
Full Safety & Traceability Compliance

More Than *an Egg Bank*

"We screen our donors on more criteria than all other egg banks, because the family you are building deserves certainty."

Traditional egg banks focus primarily on medical eligibility and egg quality. At OVACY, we go significantly further, evaluating the whole person: their intelligence, psychological robustness, personality, and genetic compatibility. Our dedicated fertility staff personally meets every candidate, and would only approve a donor they would confidently recommend to their own patients.

AI Facial Recognition Matching

Advanced biometric algorithms ensure phenotypic compatibility between donor and recipient.

Psychological Assessment

Not mandatory in Cyprus, but we conduct a full psychological assessment for every donor. We are the only clinic in Cyprus to do so, because we believe it is essential for a responsible, ethical programme.

Intuition-Based Interview

Our fertility team personally meets every candidate, only those they would recommend to their own patients are accepted.

Your Patient Journey

Five thoughtfully designed steps guide you from first enquiry to successful treatment, seamlessly and with full support at every stage.

01

REGISTER

Create your free profile on our website to access our full donor database.

02

SELECT DONOR

Filter donors by criteria or use our AI facial recognition matching system.

03

SPEAK WITH US

Email info@ovacy.com to ask any questions about your preferred donor.

04

CONFIRM ORDER

Select your desired quantity and confirm your order with our care team.

05

DELIVERY

Delivered in state-of-the-art shipper tanks to your clinic anywhere worldwide.

ANONYMOUS & NON-ANONYMOUS DONORS

OVACY offers both Non-ID Release (Anonymous) and ID Release (Non-Anonymous) options, fully compliant with each country's legal framework. We guide you to the right choice for your family.

DOOR-TO-DOOR HAND DELIVERY

Our dedicated logistics service ensures safe, temperature-controlled, fully traceable delivery directly to your chosen fertility clinic, door to door, to all destinations worldwide.

Why Choose OVACY

Diverse Multi-Ethnic Donor Pool

700+ donors, Caucasian, Asian, African, Latino & Hispanic.

AI Facial Recognition Matching

Advanced biometric algorithms find the closest phenotypic match for your family.

Genetic Compatibility Matching

Donor–recipient genomic compatibility screening, identifying inherited risk across a comprehensive panel of disease-causing genes.

Extended Genetic Panel

We provide an extended genetic panel covering 2,000+ genes, with results available within 3–5 working days.

Anonymous & ID Release Options

Both Non-ID and ID Release donors, with full legal compliance in each country.

Routine DNA Extraction

Free DNA extraction stored for all donors, safeguarding recipients and their offspring.

No Waiting Times

Our ready-to-ship vitrified egg inventory means you can begin treatment without delay.

Door-to-Door Hand Delivery

We hand deliver directly to your chosen clinic, door to door, anywhere in the world, with full temperature control and traceability.

700+

A Donor for Every Family

Our growing multi-ethnic database of 700+ donors includes Caucasian, Asian, African, Latino and Hispanic profiles, all rigorously screened and ready to support your family-building journey.

Our Donor Screening Process

Every donor passes through multiple layers of evaluation before joining our programme, medical, genetic, psychological, cognitive, and ethical.

GENERAL BLOOD TESTS

- Blood Group & Rhesus Factor
- Haemoglobinopathy
- Full Blood Count (FBC)

SEROLOGY

- Syphilis VDRL
- CMV IgG & IgM
- HTLV I/II

INFECTIOUS DISEASE, REAL-TIME PCR

- HIV
- Hepatitis B & C

MICROBIOLOGICAL CULTURE

- Neisseria Gonorrhoea (PCR)
- Chlamydia (PCR)

HORMONES

- Anti-Müllerian Hormone (AMH)

GYNAECOLOGICAL ASSESSMENT

- Pelvic Ultrasound

EXTENDED GENETIC TESTS

- Alpha & Beta Thalassaemia (HBA1/HBA2)
- HBB Hemolytic Anaemia
- G6PD Deficient (Favism)
- CFTR Cystic Fibrosis
- SMN1 Spinal Muscular Atrophy
- GJB2/GJB6 Deafness, Autosomal Recessive, Type 1A; Deafness, Digenic
- FMR1 Fragile X Syndrome
- HEXA Tay-Sachs Disease
- DMD Duchenne/Becker Muscular Dystrophy

BEYOND CLINICAL, OUR HIGHER STANDARDS

- Personality Evaluation (Big Five framework)
- Psychological Assessment (voluntary, conducted by our clinical psychologist)
- Medical & Family History (full)
- Routine DNA Extraction (stored free)

- 1 Initial intuition-based conversation with our fertility team
- 2 Evaluation of AMH levels and baseline ultrasound scan
- 3 Comprehensive medical examination, genetic and infectious disease testing
- 4 Psychological assessment by our in-house clinical psychologist
- 5 Approval by in-house clinical psychologist and Medical Director
- 6 Final approval by OVACY Egg Bank Manager before joining the programme

Meet Our *Donors*

Our donors are real people, carefully chosen individuals who share a common desire to help others build families. Only those who meet our comprehensive criteria and pass our personal evaluation are accepted.

- Ages range from 18 to 33 years, ensuring optimal egg quality and AMH levels.
- Diverse educational and occupational backgrounds, from students to professionals.
- Physically healthy, with a voluntary psychological assessment conducted by our in-house clinical psychologist, the only clinic in Cyprus to offer this.
- Represent a variety of ethnicities, Caucasian, Asian, African, Latino & Hispanic.

WHAT MOTIVATES OUR DONORS?

Each donor profile includes a personal statement about their motivation. The most common driving forces are:

Altruism

The desire to give the gift of life, helping another family experience the joy of parenthood.

Passing on Genes

Some donors wish to pass on their genetic legacy, particularly those uncertain about having their own children.

Personal Connection

Personal experience with infertility, within family or social circle, often inspires donors to help others.
